DETAILED ACTION

Response to restriction requirement filed 04/27/00 is acknowledged. Applicant elected, with traverse, Group II, claims 7-11. Applicant argues that the search would not be burdensome because of the group's similar or same classification. Where it is necessary to search for one of the distinct subjects in places where no pertinent art to the other subject exists, a different field of search is shown, even though the two are classified together. As stated in the requirement, the inventions are unrelated as they have different modes of operation, different functions, or different effects. A reference teaching, e.g., method of screening for drugs against one strain will not teach or suggest method of screening for drugs against another strain or a method of determining drug sensitivity of population. The restriction requirement is still deemed proper and is therefore made FINAL. Claims 1-6,12-30 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected groups.

Further restriction

Upon further consideration of the restriction requirement made in the previous Office action the following additional election of species requirement was deemed necessary.

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

Art Unit: 1631

The claims of the Group are individually or dependently directed to method of use of a plurality of disclosed patentably distinct species nucleic acids. For the purposes of initial examination on merits, applicant is required to elect a single disclosed species of each for

- 1) nucleic acids recited in the items a)-c) of claim 7, and
- 2) for species of mutants recited in each of the items a)-c) of claim 7.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed, even though the requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (703) 305-4506. Dr. Borin can normally be reached between the hours of 8:30 A.M. to 5:00 P.M. EST Monday to Friday. If
